 - *Veterans may also qualify for VA benefits through GI Bill*
 - *Apprentices may earn pay increases at 6 months intervals*
- Opportunity to participate at:**
- *Local Apprentice Contest*
 - *Western States Contest*
 - *National Apprentice Contest*

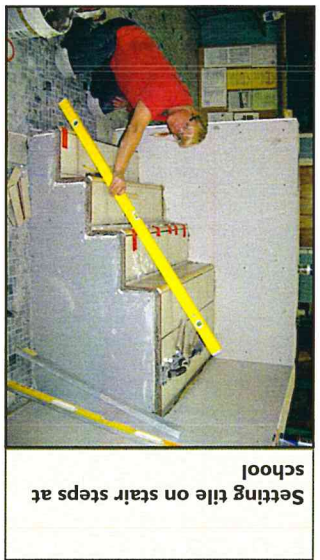

Tile Laying – What is it?

Tile Layers, also called Tile Setters, install glass, ceramic or stone tile that you see in showers, tubs, kitchen countertops, floors, stairs, building exteriors and many other areas. Many times they install a thick mortar base of sand, cement and lime to create a flat or curved surface for the tile installation. They may work in a new housing, in occupied homes, or on large commercial projects, malls, schools or hospitals. Work is both indoors and outdoors and at times may involve working off of scaffolding.

Tiling an arch project at school

Tile Layer apprenticeship consist of 5000 hours On-the-Job Training for 5 periods. After each period you will receive a wage increase, provided you also have completed the required (school) RSI credits.

Setting tile on stair steps at school

Women and Minorities are encouraged to apply

Tile Finishing – What is it?

Tile Finishers work together with Tile Layers to create installations of ceramic, glass or stone tile. The Finisher does most of the setting up of materials at the job and clean up before & after. They mix all mortars, by machine or by hand mixing.

Finishing (grouting) tile work.

The Finisher grouts in all tile set by the Tile Layers, which may include showers, tubs, countertops, floors, stairs, building exteriors, ceilings and others. The Finisher also cleans and polishes finished surfaces, They may also perform finish caulking. Tile Finishing is very active work and is often strenuous. It may involve working off of scaffolding. Tile Finisher apprenticeship consist of 2100 hours On the Job Training for 3 periods. After each period you will receive a wage increase, provided you also have completed the required (school) RSI credits.
